NEED HELP?

WHO IS TM FILTRATION?

TM Filtration is a division of TM Industrial Supply, Inc established in 1976 as a manufacturer of separators, receivers, and knockout pots for the air and gas markets. Headquartered in Erie, Pennsylvania , our services include Engineering, Inside Sales and Support, Purchasing as well as Manufacturing of custom engineered products designed to meet each customer's specification and built to ASME Section VIII Div. 1 pressure vessel code. "U" Stamp available.

CUSTOM ENGINEERED FILTRATION SOLUTIONS

"Products don't solve Problems, Solutions solve Problems"

Patented GFC – Gas Filter Coalescer (Page 6)

- Cleanable, reusable, "Green" coalescing filter element
- Efficiently removes both solid and liquid particles down to 0.3 microns
- Out-to-In flow with pleated filter element for longer usable life before maintenance is required
- Pleated filter design provides a larger filtering surface area
- GFC Element is cleanable using an Ultrasonic Filter Cleaner (**Page 43**)

Patent Pending RGF / RGFHT– Resilient Gas Filter (Page 32, 36)

- Cleanable, reusable, "Green" particulate filter element for gas and liquid
- Out-to-In flow with pleated design for large contaminant holding capacity
- Durable backflushable filter element for use in automated, self-cleaning systems
- Standard particulate removal of 2, 5, 10, 25 and 50 microns (Other sizes available)
- RGFHT model used for application temperatures up to 1500°F (815°C)

Patented POSI-Sealoc II™ Quick Opening Closure (Page 10)

- Designed to be both safe and efficient
- The wheel driven, cam operated opening is quick, easy, and eliminates the need for tools or torquing thus significantly reducing maintenance time and personnel requirements.
- A Safety Pin acts as a Pressure Warning Device, alerting operators that the vessel is still under pressure, preventing accidental blow off of lids and injuries.
- A Safety Pin acts as a Pressure Warning Device, alerting operators that the vessel is still under pressure, preventing accidental blow off of lids and injuries.

Our sister company, Fluid Engineering, provides custom designed Automatic and Manual strainers for water applications. For further information about their products and services, visit www.fluideng.com.

PATENTED & INNOVATIVE FILTRATION TECHNOLOGIES

INNOVATIONS IN COALESCING FILTRATION

**TM Filtration "New Flow Technology"
Outside to In Flow path
(Two Phase Coalescer Shown)**

Patent No. 7,332,010

**LOOK FOR OUR CLEANABLE FILTRATION
LOGO THROUGHOUT THIS CATALOG FOR
GREEN PRODUCTS THAT CAN BE REUSED**

Coalescing

Coalescing is the process where liquid aerosols in a compressed gas/air system are forced to join together into large droplets. These combined droplets then can be drained away by gravity.

Conventional Coalescing

The conventional coalescing elements by design have the compressed gas/air flowing from inside the element to the outside. This has been the design since the inception of coalescing filtration.

New Flow Technology

TM Filtration has now developed and patented the "NEW FLOW TECHNOLOGY" where the gas/air flows from the "OUTSIDE TO INSIDE" of the element. This allows a pleated element design to be utilized.

Pleated Element Design

Our pleated design has a larger surface area which allows for more contaminant holding capacity, a longer working life, fewer change outs, and less downtime. The surface area of a GFC element may have up to 20 times greater holding capacity than similar dimensioned conventional elements.

Reduced Vessel Quantity

Coalescing systems utilizing conventional technology require Knock Out Pots and Vane separators to be incorporated where high liquid loadings are present. If this liquid is not removed the conventional elements become saturated and ineffective. The flow path of the GFC Coalescing filter, allows large quantities of water to fall out of the gas/air and settle into the sump prior to contacting the GFC element, eliminating the need for Knock Out Pots and Vane separators.

Particulate Filtration Included

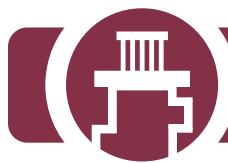

The GFC Element is constructed of several layers of filtration, including a substrate layers which functions as a particulate filtration.

Liquid Barrier

The layers of filtration removes liquid by the coalescing method. The GFC Element inner core is a final polish filtration. It safeguards any droplets of liquid from going downstream.

Cleanable Coalescing Elements

The GFC Element is constructed of materials that may be ultrasonically cleaned to extend the working life and the value of the element.

TM Filtration

TM'S GFC CLEANABLE GAS COALESCING ELEMENTS

PATENT NO. 7,332,010

EFFICIENCIES OF ELEMENT (IN CONSTRUCTED FORM)

Liquid Removal	99.99% of 0.3 μ and larger particles
Solid Removal	99.995% of 0.3 μ and larger particles

MAXIMUM TEMP RATING (CONTACT FACTORY FOR OTHER HIGH TEMP OPTIONS)

200° F (93° C)

The outer layer of the element is a **Pleated Mesh Screen**, which acts as a re-enforcement.

The **Substrate** is a spun bond polyester, which acts as a solid particulate filter layer (3 micron).

The **Micro Borosilicate Glass** is the coalescing filtration layer (3 micron absolute).

The **Inner Core** is a polypropylene tube which is designed to polish the Gas. This also functions as a liquid barrier, that only allows gas to pass.

POSI-SEALOC II® QUICK OPENING ENCLOSURES

Posi-Sealoc II® Quick Opening Enclosure

Patent No. 7,332,010 B2

- Standard closure designs for 740 PSIG @100°F ANSI 300# and 1480 PSIG @100°F ANSI 600#
- Standard closure supplied with dual BUNA-N O-ring seals.
- Other O-ring materials available (See O-Ring Material chart)
- Locking clamps have no effect on seal.
- All units supplied with pressure warning device (Lock and depressurization safety bolt)
- If removal of Pressure Warning Device is attempted while the unit is under pressure, an audible sound will be generated.
- Prevents the need for measuring the torque of the bolts, and reduces potential operator error.
- Designed in accordance to ASME VIII Div 1

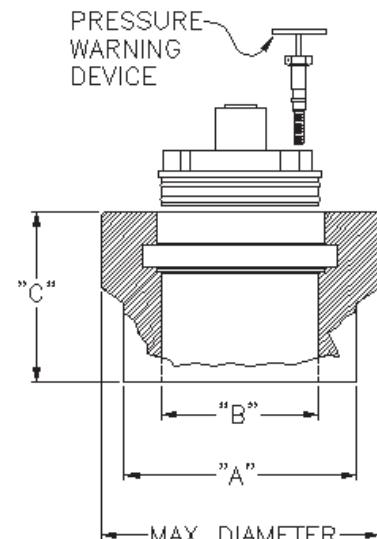

**INTEGRATED POSI-SEALOC II®

POSI-SEALOC II® RETRO-FIT KIT FOR ANSI ENCLOSURES

SERIES 337

**Posi-Sealoc II® Quick Opening Enclosure
Retro-fit kit for ANSI enclosures**

Patent No. 7,332,010 B2 USA

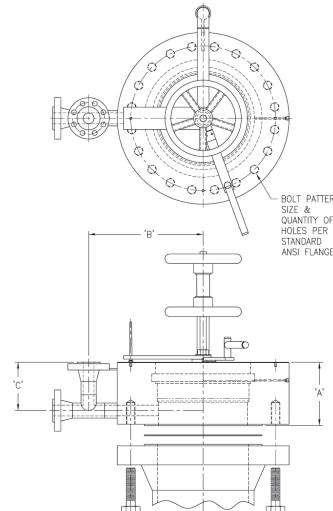

RETROFIT KIT FOR EXISTING APPLICATIONS

- Standard ANSI 600# closure design for 1480 PSIG @100°F
- Other ANSI Pressure classes available (Contact manufacturer)
- Standard includes two flanged ports for additional relief and vent. (Available without extra ports, Contact Manufacturer)
- Standard closure supplied with dual BUNA-N O-ring seals.
- Other O-ring materials available (See O-Ring Material chart)
- All units supplied with pressure warning device (Lock and depressurization safety bolt)
- If removal of Pressure Warning Device is attempted while the unit is under pressure, an audible sound will be generated.
- Prevents the need for measuring the torque of the bolts, and reduces potential operator installation error.
- Designed in accordance to ASME VIII, Div 1
- Other custom bore sizes available (Contact manufacturer)

PATENTED & INNOVATIVE FILTRATION TECHNOLOGIES

TM Filtration

OVERVIEW OF 3 PHASE GAS COALESCING

3 PHASE GAS COALESCING FILTERS

SERIES 343, 383, 393
Patent No. 7,332,010

TM Filtration's three-phase coalescing filter vessels are used where high loadings, and highly saturated gasses are at their worst.

TM Filtration's pleated GFC coalescing element ensures maximum removal of liquid and solid particulate, while minimizing frequent and expensive element change outs by utilizing our standard patented high capacity element. It also reduces your future costs of spare elements, as our elements may be ultrasonically cleaned.

The three-phase separator/filter combines the functionality of a vane or mesh separator, with the high efficiency, high capacity GFC coalescing filter; thus removing the need for separate vessels, and their additional cost.

APPLICATIONS:

Turbine protection
Gas compressor oil & water removal
Meter protection
Liquid removal prior to compressed gas storage
Heat exchanger protection
Air compressor protection
Vacuum pump protection (when a knock out pot is not enough)

DESIGN INFORMATION:

- Gas radial velocity impacting on the surface area of the coalescing element $\leq 0.5 \text{ ft / sec}$
- Clean pressure drop inlet to outlet $\leq 1 \text{ psid}$ Vessels are available in full ANSI class ratings
- All vessels are designed per ASME code Section VIII Div. 1 (Latest addendum)
- ASME "U" Stamp available upon request

Notes: Body material, connections, available options, and dimensions are completely customizable. Dimensions and options availability are subject to change without notice. Please consult the TM Sales Department or your local sales representative for certified drawings, or additional information.

PATENTED & INNOVATIVE FILTRATION TECHNOLOGIES

TM Filtration

3 PHASE GAS COALESCING

SERIES 343

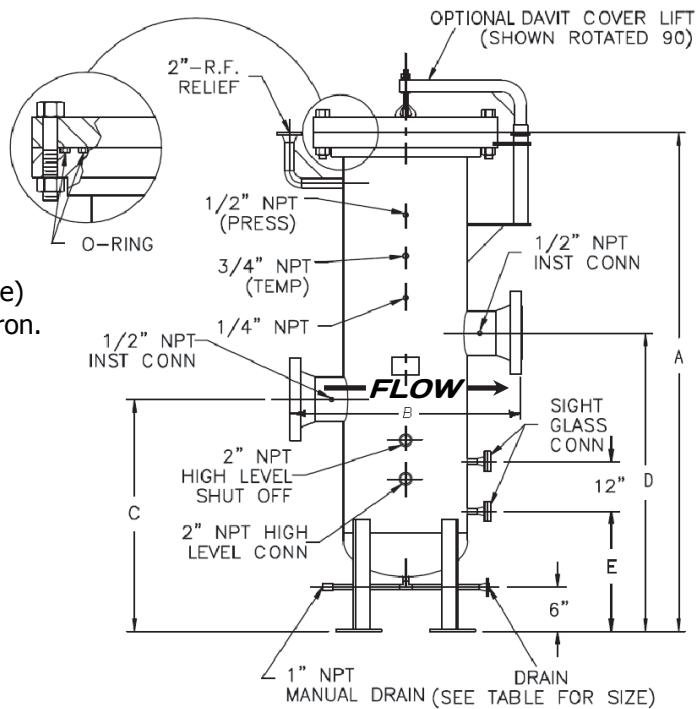

3 Phase Separator/Coalescing Filter with Dual O-Ring seal
Patent No. 7,332,010

Standards:

- Designed, manufactured, and tested in accordance with ASME Section VIII, Division 1. ('U' Stamp available)
- Coalescing filter incorporates a filtration level of 3 micron.
- Provisions for legs
- Buna-N seals
- Built in Reservoir
- Smaller Diameter bolting requirements than standard flange.

Filter Element:

- GFC pleated cleanable coalescing filter elements, with "New Flow Technology" out to in design.

TM Filtration

3 PHASE GAS COALESCING

SERIES 383D

Duplex 3 Phase Separator/

Coalescing Filter

with Posi-Sealoc II ®

Quick Opening Enclosure

Patent No. 7,332,010

7,850,751 B2

2,426,752 CAN

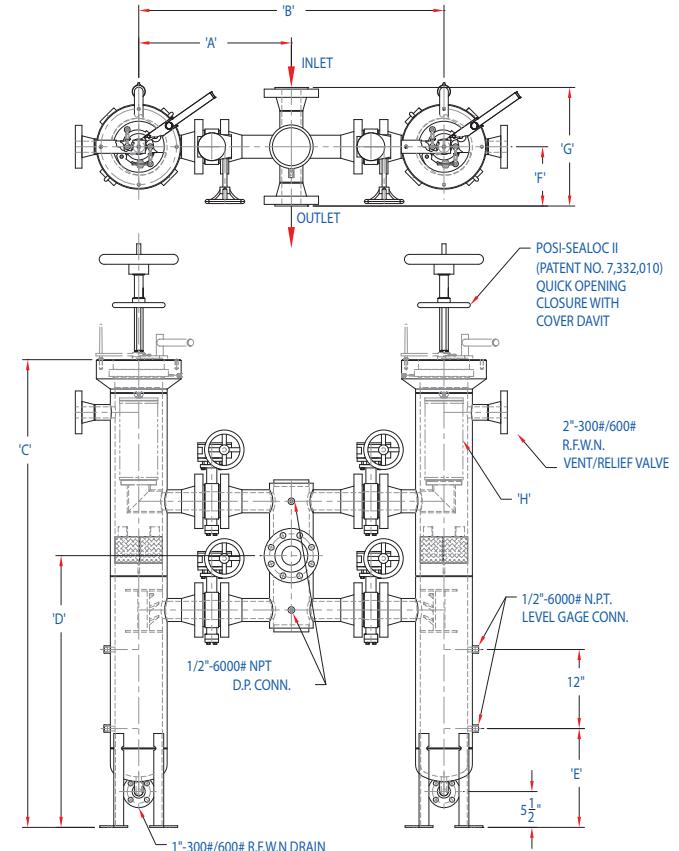

Standards:

- Designed, manufactured, and tested in accordance with ASME Section VIII, Division 1. ('U' Stamp available)
- Designed per ANSI 300# or 600# Rating
- Coalescing filter incorporates a filtration level of 3 micron.
- Buna-N seals
- Built in Reservoir
- Quick opening cover with no bolts to torque.
- Standard "Pressure Warning Device" (PWD) (See page 12)

Filter Element:

- GFC pleated cleanable coalescing filter elements, with "New Flow Technology" out to in design. (See page 6)

PATENTED & INNOVATIVE FILTRATION TECHNOLOGIES

Receiver

Drain Tank Receiver

Storage for filtered residual liquids from Fuel Gas

APPLICATIONS:

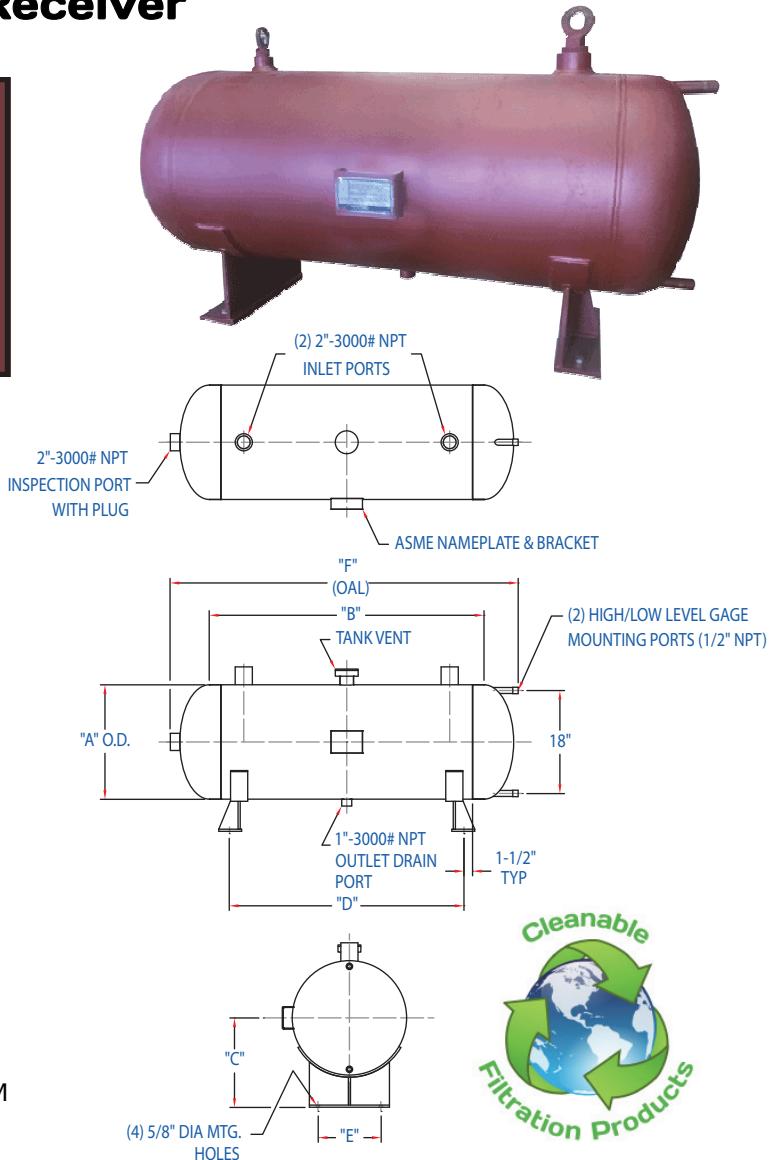

- Liquid storage at site independently
- Packaged with 383D Duplex Skid system

DESIGN INFORMATION:

- Horizontal orientation
- Designed, constructed, and tested in accordance with ASME Section VIII, Division 1 ("U" Stamp available)
- Maximum Pressure rated: 100 PSI @ 150°F
- Fittings:
 - 2" NPT Inlets (option to be flanged)
 - 1" NPT Outlet drain
 - 2" NPT Inspection port w/ plug
 - 1/2" NPT Level Gage mounting ports
 - Tank vent
- Support: Saddle support with structural legs
- Material: Carbon Steel
- Painting:
 - Interior: Black Magna Coat
 - Rust prohibitive
 - Exterior: Red Oxide

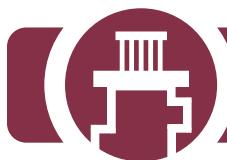

OPTIONS:

For higher pressure rated availability, please consult with TM Sales department

TM Filtration

OVERVIEW OF 2 PHASE GAS COALESCING

2 PHASE GAS COALESCING FILTERS

SERIES 342, 382, 392, 392H, 392E, 392ER
Patent No. 7,332,010

TM Filtration's two-phase coalescing filter vessels are used where liquid and particulate loadings are not sufficient enough to warrant a three-phase design. TM Filtration's pleated GFC coalescing element ensures maximum removal of liquid and particulate while minimizing expensive change-outs and spare filter purchases.

APPLICATIONS:

Turbine protection
Gas compressor oil & water removal
Delicate instrumentation protection
Meter protection
Liquid removal prior to compressed gas storage
Heat exchanger protection
Air compressor protection

DESIGN INFORMATION:

- Gas radial velocity impacting on the surface area of the coalescing element $\leq 0.5 \text{ ft / sec}$
- Clean pressure drop inlet to outlet $\leq 1 \text{ psid}$ Vessels are available in full ANSI class ratings
- All vessels are designed per ASME code Section VIII Div. 1 (Latest addendum)
- ASME "U" Stamp available upon request

Notes: Body material, connections, available options, and dimensions are completely customizable. Dimensions and options availability are subject to change without notice. Please consult the TM Sales Department or your local sales representative for certified drawings, or additional information.

PATENTED & INNOVATIVE FILTRATION TECHNOLOGIES

TM Filtration

2 PHASE GAS COALESCING

SERIES 342

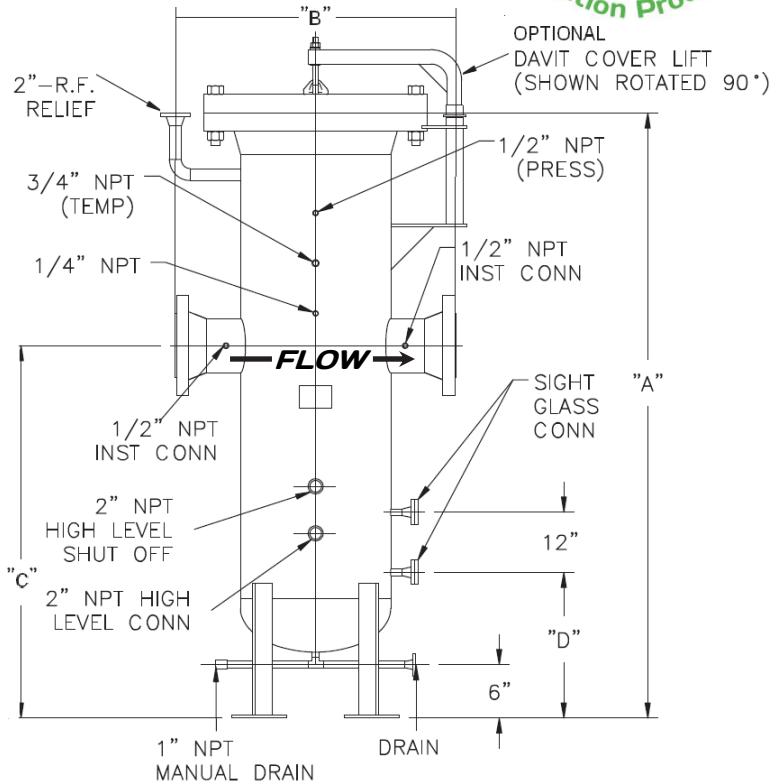

**2 Phase Coalescing
Filter with Dual O-Ring seal
Patent No. 7,332,010**

Standards:

- Designed, manufactured, and tested in accordance with ASME Section VIII, Division 1. ('U' Stamp available)
- Coalescing filter incorporates a filtration level of 3 micron.
- Provisions for legs
- Buna-N seals
- Built in Reservoir
- Smaller Diameter bolting requirements than standard flange.

Filter Element:

- GFC pleated cleanable coalescing filter elements, with "New Flow Technology" out to in design.

TM Filtration

LOW COST 2 PHASE GAS COALESCING

SERIES 392E

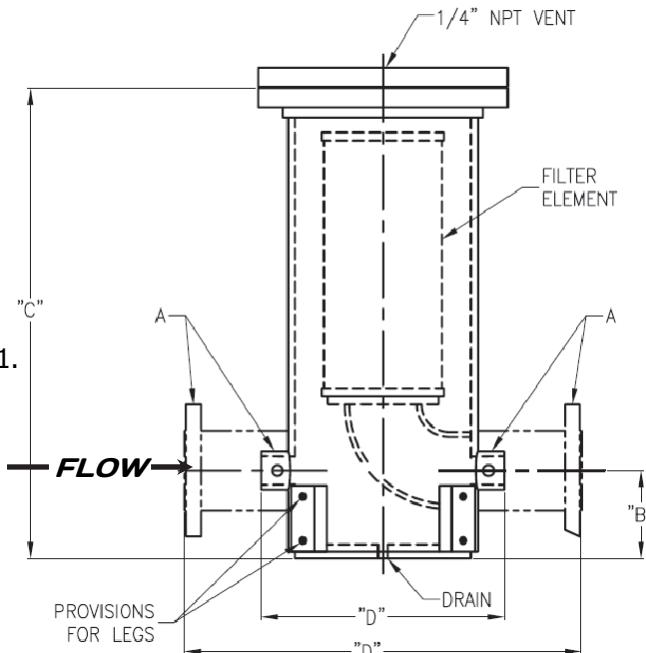

**2 Phase Coalescing Filter
270 PSIG* with Bolted Cover
Patent No. 7,332,010**

Standards:

- Designed, manufactured, and tested in accordance with ASME Section VIII, Division 1. (No 'U' Stamp)
- Dimensional drawings available upon request.
- Coalescing filter incorporates a filtration level of 3 micron.
- Provisions for legs
- Buna-N seals

Filter Element:

- GFC pleated cleanable coalescing filter elements, with "New Flow Technology" out to in design.

TM Filtration

RGF CLEANABLE FINE PARTICULATE FILTER ELEMENTS FOR GAS OR LIQUID

SERIES "RGF"

Fine Particulate Filter Elements For Gas or Liquid with Posi-Sealoc II® or bolted cover and "Out to In" Flow path

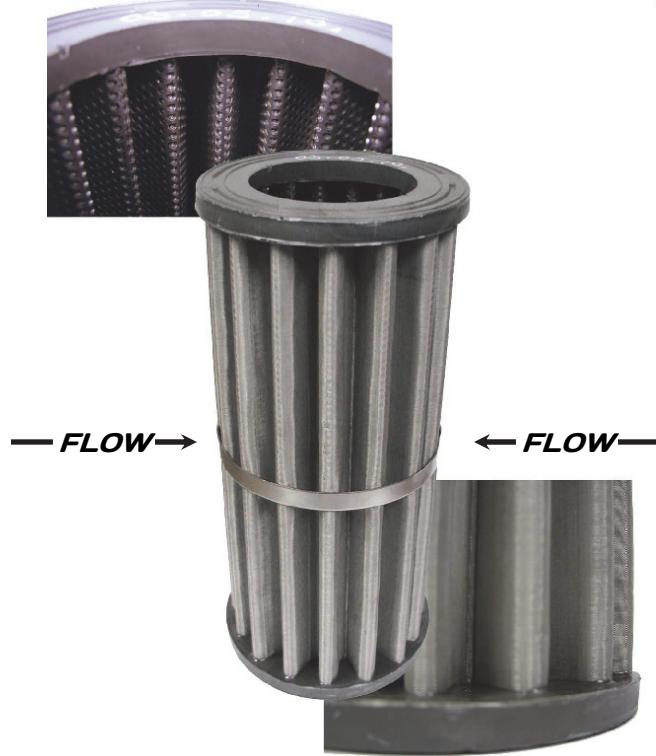

Patent Pending

APPLICATIONS

- Natural Gas Compressors
- Turbine Protection
- Water Pre-Filtration Systems
- Process Filtration
- Petrochemical / Biomass
- Pharmaceutical Reclamation

FILTRATION

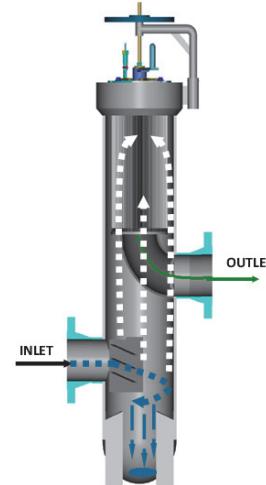

2, 5, 10, 25 or 50 microns filtration Nominal (XX)

DESIGN INFORMATION

- Maximum operating temperature 290°F (143°C)
- Resilient Back-flushable element (Air, Gas, Water, Steam)
- Designed for low pressure drop
- Stackable design to meet any desired flow rate
- "Out to In" Flow Path for large contaminant holding capacity
- RGF Element are interchangeable with same size GFC Coalescing Elements

ELEMENT NO	OD IN / MM	ID IN / MM	LENGTH IN / MM	SURFACE AREA FT ² / CM ²
991-RGF-XX-1	5.53 / 140.5	3.53 / 89.7	12 / 304.8	2.57 / 2387
991-RGF-XX-4	9.56 / 243.0	6.65 / 169.0	18 / 457.2	7.97 / 7400
991-RGF-XX-5	15.75 / 400.0	13.00 / 330.2	18 / 457.2	14.26 / 13,245

Notes: Dimensions are subject to change without notice. Other Materials of construction are available.

Please consult the TM Sales Department or your local sales representative for certified drawings or to discuss interchangeability with GFC Elements.

COMPONENTS	MATERIAL	PURPOSE
OUTER PLEATED MESH SCREEN	316 SS METALLIC SCREEN	IMPACT PROTECTION - COURSE FILTRATION
PLEATED FILTER	316 SS METALLIC FILTER LAYER	PARTICULATE FINE FILTRATION
INNER PLEATED MESH SCREEN	316 SS METALLIC SCREEN	COURSE FILTRATION (FOR BACKFLUSH)
PERF	316 SS METAL	RE-ENFORCEMENT SUPPORT
END CAPS	POLYURETHANE	RIGIDITY, SEALING SURFACE

BACK FLUSHABLE GAS OR LIQUID FINE PARTICULATE SIMPLEX/DUPLEX SYSTEMS

SERIES 311/312 & 311P & 312P

Back Flushable Fine Particulate Filter Systems utilizing the "RGF" Elements

Patent Pending

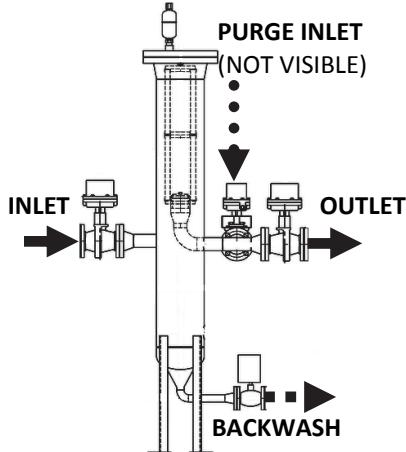

APPLICATIONS

- Natural Gas Compressors
- Turbine Protection
- Water Pre-Filtration Systems
- Process Filtration
- Petrochemical / Biomass
- Pharmaceutical Reclamation

DESIGN INFORMATION

- Vessels of Carbon Steel, Stainless Steel, or other materials.
- Pressure ranges ANSI 150#, 300#, 600#, 900#, 1500# or 2500#
- Resilient Back-flushable Cleaning System utilizing Air, Gas, Water
- Optional Control Panel (Cleaning initiated by Timer with DP Override)
- Optional Manual Change-over valves (Automatic Valves shown)
- Safety Interlocks to reduce the opportunity of pressurizing an open vessel
- Optional Posi-Sealoc II™ Quick Opening cover (311P/312P)

SERIES 311: SIMPLEX DESIGN

COVER OPTIONS:

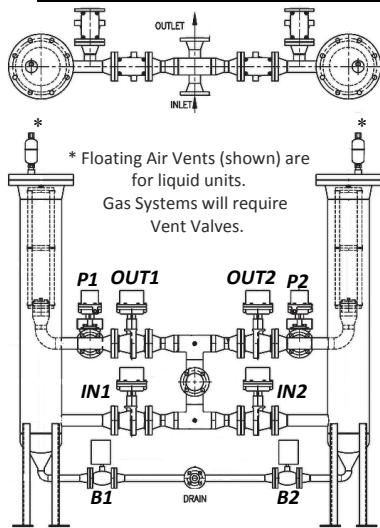

STANDARD SIMPLEX VALVE ACTUATION SEQUENCE¹⁾

VALVE DESCRIPTION	STANDARD OPERATION	CLEANING CYCLE
INLET	OPEN	CLOSED
OUTLET	OPEN	CLOSED
BACKWASH / BLOWDOWN	CLOSED	OPEN
PURGE	CLOSED	OPEN

1) DEPENDANT ON MEDIA TYPE AND APPLICATION PARAMETERS. OTHER VALVES MAY BE NECESSARY. PLEASE CONSULT THE FACTORY FOR MORE DETAILED INFORMATION.

SERIES 312: DUPLEX DESIGN

STANDARD DUPLEX VALVE ACTUATION SEQUENCE²⁾

VALVE DESCRIPTION	STANDARD OPERATION (VESSEL 1 FILTERING)	CLEANING CYCLE (VESSEL 1 CLEANING)	POST CLEAN (PENDING SWITCH)
INLET (IN1)	OPEN	CLOSED	CLOSED
OUTLET (OUT1)	OPEN	CLOSED	CLOSED
BACKWASH / BLOWDOWN (B1)	CLOSED	OPEN	CLOSED
PURGE (P1)	CLOSED	OPEN	CLOSED
INLET (IN2)	CLOSED	OPEN	OPEN
OUTLET (OUT2)	CLOSED	OPEN	OPEN
BACKWASH / BLOWDOWN (B2)	CLOSED	CLOSED	CLOSED
PURGE (P2)	CLOSED	CLOSED	CLOSED

2) DEPENDANT ON MEDIA TYPE AND APPLICATION PARAMETERS. OTHER VALVES MAY BE NECESSARY. PLEASE CONSULT THE FACTORY FOR MORE DETAILED INFORMATION.

Notes: Vessel Material, Connections, Available Options, and Dimensions are customizable.. Option availability is subject to change without notice. Consult the TM Sales Department or your local sales representative for more information.

RGFHT CLEANABLE HIGH TEMPERATURE FINE PARTICULATE FILTER ELEMENTS FOR GAS OR LIQUID

SERIES "RGFHT"

**Fine Particulate Filter Elements
For Hot Gas or Hot Liquid with
bolted covers and "Out to In"
Flow path**

Patent Pending

APPLICATIONS

- Gasification Systems (IGCC, BIOMASS, etc)
- Pyrolysis, Combustion, and Catalytic processes
- Municipal Solid Waste Incineration
- Hot Water Filtration
- Petrochemical
- Pharmaceutical
-

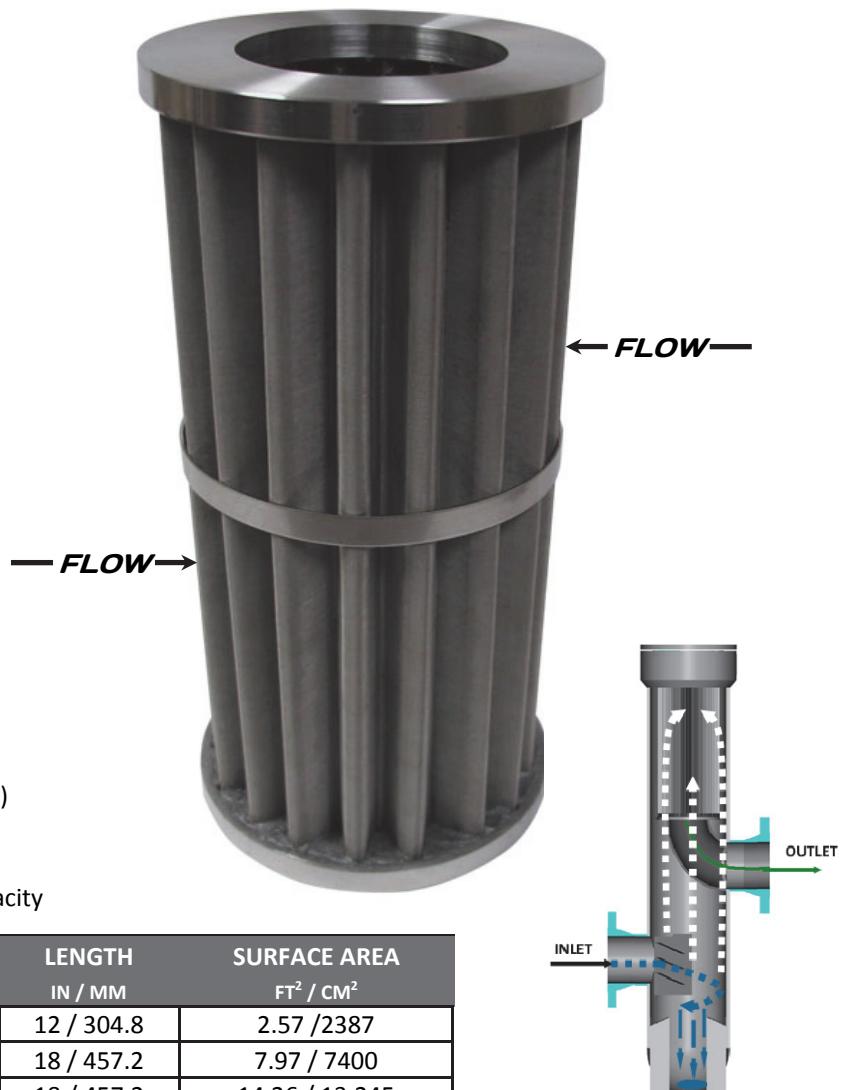

FILTRATION

2, 5, 10, 25 or 50 microns filtration Nominal (XX)

DESIGN INFORMATION

- Maximum operating temperature **1500°F (815°C)**
- Resilient Back-flushable element (Air, Gas, Water, Steam)
- Designed for low pressure drop
- Stackable design to meet any desired flow rate
- "Out to In" Flow Path for large contaminant holding capacity

Notes: Dimensions are subject to change without notice. Other Materials of construction are available.
Please consult the TM Sales Department or your local sales representative for certified drawings or to discuss interchangeability with GFC Elements.

COMPONENTS	MATERIAL	PURPOSE
OUTER PLEATED MESH SCREEN	316 SS METALLIC SCREEN	IMPACT PROTECTION - COURSE FILTRATION
PLEATED FILTER	316 SS METALLIC FILTER LAYER	PARTICULATE FINE FILTRATION
INNER PLEATED MESH SCREEN	316 SS METALLIC SCREEN	COURSE FILTRATION (FOR BACKFLUSH)
PERF	316 SS METAL	RE-ENFORCEMENT SUPPORT
END CAPS	316 SS METAL	RIGIDITY, SEALING SURFACE

PATENTED & INNOVATIVE FILTRATION TECHNOLOGIES

TM Filtration

HIGH TEMP BACK FLUSHABLE GAS OR LIQUID FINE PARTICULATE SIMPLEX/DUPLEX SYSTEM

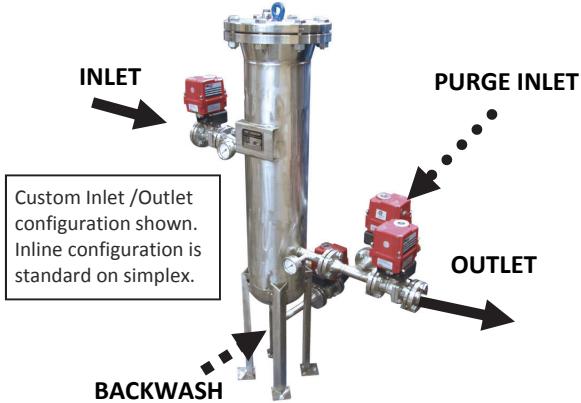

SERIES 371 & 372

Back Flushable Fine Particulate Filter Systems utilizing the "RGFHT" Elements

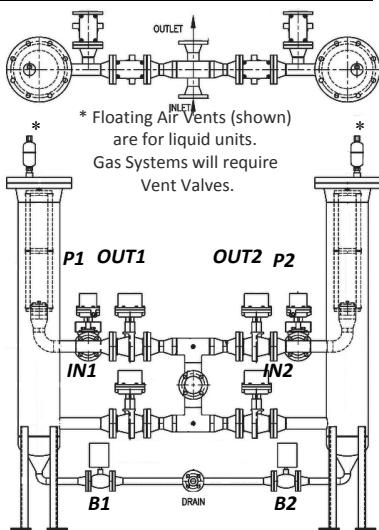

Patent Pending

SERIES 371: SIMPLEX DESIGN

SERIES 372: DUPLEX DESIGN

Notes: Vessel Material, Connections, Available Options, and Dimensions are customizable.. Option availability is subject to change without notice. Consult the TM Sales Department or your local sales representative for more information.

APPLICATIONS

- Gasification Systems (IGCC, BIOMASS, etc)
- Pyrolysis, Combustion, and Catalytic processes
- Municipal Solid Waste Incineration
- Hot Water Filtration

DESIGN INFORMATION

- Vessels of Carbon Steel , Stainless Steel, or other materials .
- Pressure ranges ANSI 150#, 300#, 600#, 900#, 1500# or 2500#
- Resilient Back-flushable Cleaning System utilizing; Air, Gas, Water
- Optional Control Panel (Cleaning initiated by Timer with DP Over-ride)
- Optional Manual Change-over valves (Automatic Valves shown)
- Safety Interlocks to reduce the opportunity of pressurizing an open vessel

STANDARD SIMPLEX VALVE ACTUATION SEQUENCE¹⁾

VALVE DESCRIPTION	STANDARD OPERATION	CLEANING CYCLE
INLET	OPEN	CLOSED
OUTLET	OPEN	CLOSED
BACKWASH / BLOWDOWN	CLOSED	OPEN
PURGE	CLOSED	OPEN

1) DEPENDANT ON MEDIA TYPE AND APPLICATION PARAMETERS. OTHER VALVES MAY BE NECESSARY.
PLEASE CONSULT THE FACTORY FOR MORE DETAILED INFORMATION.

SIMPLEX GAS STRAINER

SERIES 120

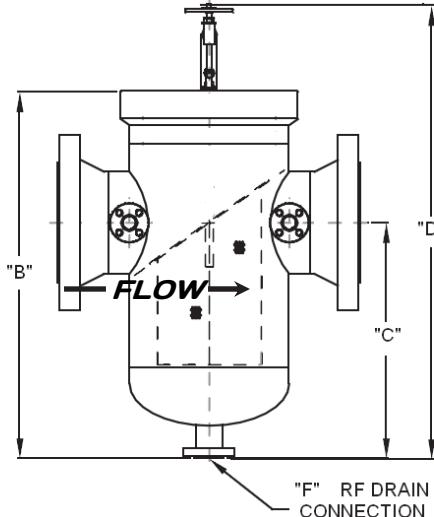

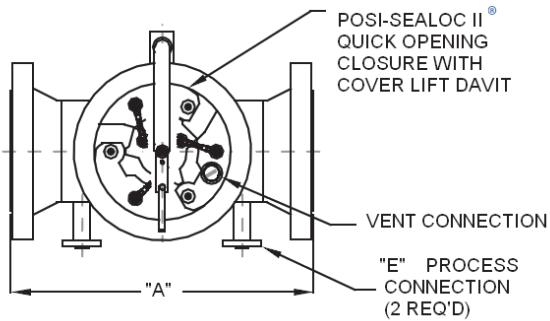

Gas Strainer with Posi-Sealoc II® Quick Opening Closure with bottom drain
Patent No. 7,332,010

Standards:

- Designed, manufactured, and tested in accordance with ASME Section VIII, Division 1. No "U" Stamp ('U' stamp available as option)
- Provisions for legs
- Buna-N seals
- Flat bottoms with side drain available option.
- Standard "Pressure Warning Device" (PWD) See *Page 10* for more information.

Straining/Filtration:

- High flow mesh basket with filtration to 25 micron

Note: * = Options for 150#, 300#, 600#, 900#, 1500# or 2500# RF connections. Body material, connections, available options, and dimensions are completely customizable. Dimensions and options availability are subject to change without notice. Please consult the TM Sales Department or your local sales representative for certified drawings, or additional information.

PATENTED & INNOVATIVE FILTRATION TECHNOLOGIES

TM Filtration

FINE GAS STRAINER

SERIES 132

**Fine Gas Strainer/
Polisher with
Posi-Sealoc II ®
Quick Opening Closure
and bottom drain
Patent No. 7,332,010**

**CONVOLUTED BASKET
PROVIDES LARGER OPEN AREA
FOR BETTER FILTRATION**

APPLICATIONS

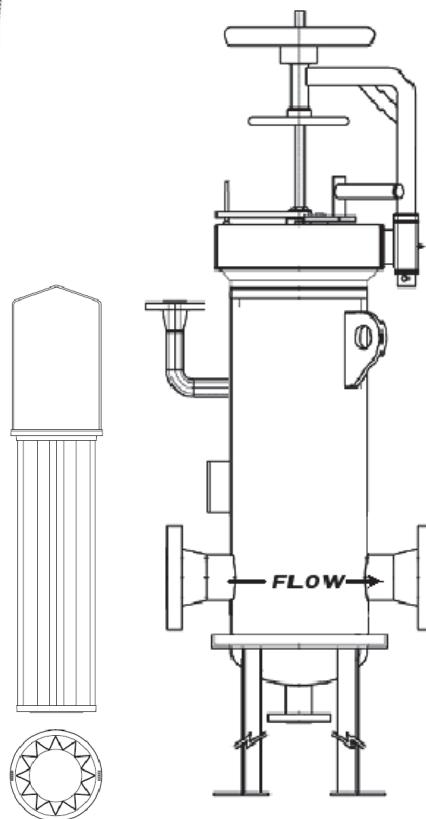

- Natural Gas Compressor stations
- Skid Filtrations Systems
- Fine Water Filtration Systems

STRAINING / FILTRATION

- High flow Convolute Dutch Weave Mesh basket with filtration to 2 micron (nominal) (Options for other meshes)

DESIGN INFORMATION

- Designed, manufactured, and tested in accordance with ASME Section VIII, Division 1. 'U' Stamp available)
- Posi-Sealoc II ® Quick Opening Closure
- Provisions for legs
- Buna-N seals
- Maximum Temperature rating for Basket 290°F
- Standard Pressure Warning Device (PWD)
- Pressure ranges ANSI 150#, 300#, 600#, 900#, 1500# or 2500#
- Seal material, Vessel material, Dimensions, and Coatings may be customized.

Notes: Body material, connections, available options, and dimensions are completely customizable. Options availability is subject to change without notice. Please consult the TM Sales Department or your local sales representative for certified drawings, or additional information.

PATENTED & INNOVATIVE FILTRATION TECHNOLOGIES

TEMPORARY CONICAL GAS STRAINERS

SERIES CRS & CRL

TEMPORARY CONICAL GAS REVERSE FLOW STRAINERS

CRS (Short) & CRL (Long)

Temporary (Conical) Strainers are very low cost pipeline strainers that are designed for new system start-up. They offer protection for process equipment against damage causing contamination present during start-up and commissioning.

Applications:

Temporary protection during new system start up and system change outs.

Since these strainers are temporary, they need to be installed in a section of pipe such as a removable spool piece. These units should be removed and thrown away after the initial cleaning of the system.

DESIGN INFORMATION

- Conical strainers can be manufactured in a range of different configurations to suit your specific requirements.
- Conical strainers can be supplied in 304 stainless steel, 316 stainless steel, monel, or other materials.

Notes: Please consult the TM Sales Department or your local sales representative for certified drawings, or additional information.

TM Filtration

EXTENDED DUTY HIGH PRESSURE CONICAL GAS STRAINERS

SERIES CRL-HP

Extended Duty - Reverse Flow Conical Strainers For Compressed Gas Applications with High Solid Loading potential

The **CRL-HP** is ideal for long term particulate protection of gas production and distribution systems that have the potential for high solid loading.

Our robust design of the **CRL-HP** allows the unit to withstand differential pressures of up to 75 PSID.

These strainers are installed by sandwiching it between two flanges in a removable section of pipe, such as a spool piece.

The differential pressure across this strainer should be monitored to indicate when the strainer should be removed from the system and cleaned.

APPLICATIONS

- Extended protection of Natural or Shale Gas process equipment

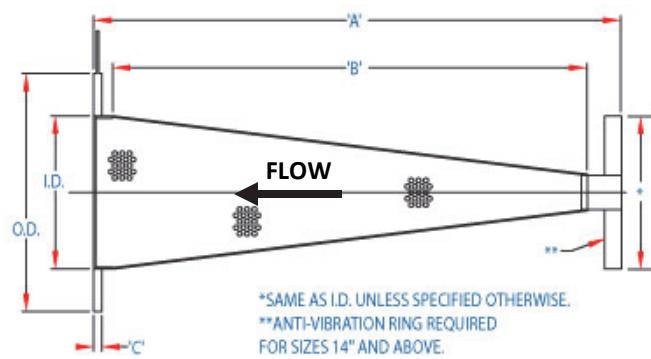

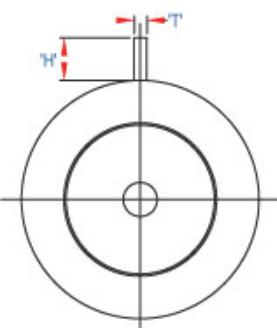

FILTRATION

Wire mesh available in a multitude of options. Please contact the factory for more information.

MATERIALS OF CONSTRUCTION

316 Stainless Steel is standard. Please consult the factory for other material options

PATENTED & INNOVATIVE FILTRATION TECHNOLOGIES

TM Filtration

SINGLE PHASE KNOCK-OUT POT & 2 PHASE VANE SEPARATOR

SINGLE PHASE KNOCK-OUT POT

Where liquids are greater than 5% of the weight of the mixture.

TM Filtration's KNOCK-OUT POTs are designed for both pressure and vacuum applications.

Applications:

Vacuum pump protection
Compressor protection
Removal of heavily entrained liquid at gas wells
Removal of contaminant and particulates at gas wells
Gas Dryer protection

KNOCK-OUT POT

DESIGN INFORMATION

- Uses impingement and centrifugal separation to remove liquid and particulates from gas flow.
- Vertical or horizontal orientation
- Designed for low pressure drop
- Designed, manufactured, and tested in accordance with ASME Section VIII, Division 1. "U" Stamp available upon request

2 PHASE VANE SEPARATOR

Where "Old Style" Coalescing Filters are used and there is greater than 5% Liquid by weight of gas mixture.

TM Filtration's 2 phase vane separators are used where a wide range of flows are possible.

Applications for 2 phase vane separators involve removal of large amounts of liquid from the Air/Gas stream. Ideal when liquid is greater than 5% of the weight of the mixture.

Applications:

Removal of viscous liquids.
Recovery of product in some chemical applications
Prevents carryover of corrosives

VANE SEPARATOR DESIGN INFORMATION

- Vertical or horizontal orientation
- Designed for low pressure drop
- High efficiency 99.8% > 10 micron removal of solids or liquids.
- Designed, manufactured, and tested in accordance with ASME Section VIII, Division 1. "U" Stamp available upon request

Notes: Body material, connections, available options, and dimensions are completely customizable. Options availability is subject to change without notice. Please consult the TM Sales Department or your local sales representative for certified drawings, or additional information.

TM Filtration

ULTRASONIC FILTER CLEANING EQUIPMENT

UFC-1818

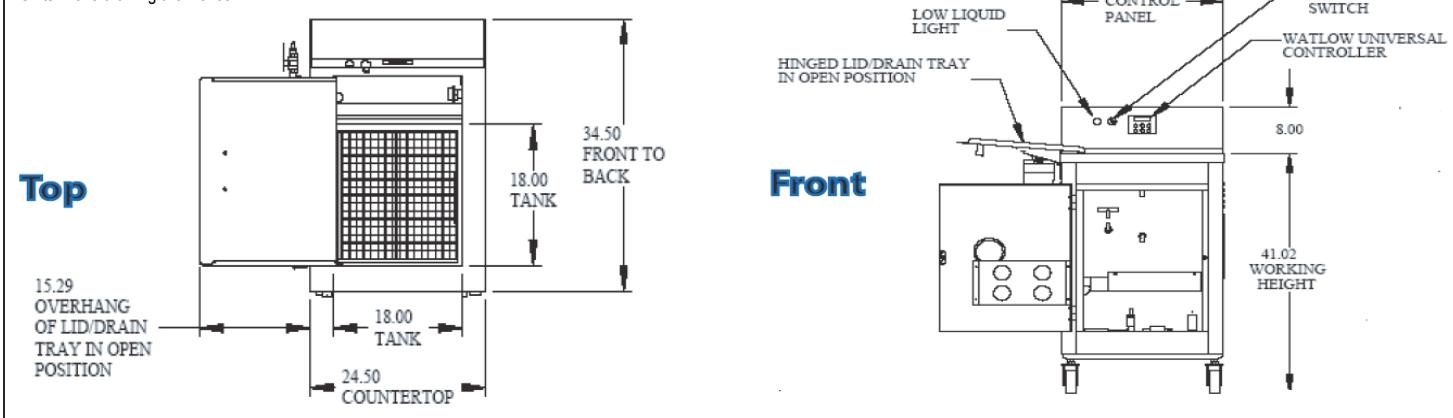

Ultrasonic Filter Cleaner
Ultrasonic power (40kHz) 2,000 Watts
Heating power 1,800 Watts
25 gallons tank

Standard Features:

- 2,000 Watts of ultrasonic cleaning power
- 1,800 Watts of heating power
- 316L Stainless steel construction
- High performance ultrasonics, metallurgically attached transducers
- Dual filter system
- Oil removing surface sparger
- Low level liquid protection
- 7-day programmable timer
- Parts basket
- Hinged lid- converts to drain shelf
- Heavy-duty locking, leveling 4" casters
- - Contact our Sales Department for additional information

Units in this drawing are inches.

Dimensions: Left Right x Front Back x Depth Height
Tank: 18" x 18" x 20" (458mm x 458mm x 508 mm)

Overall: 24.5" x 34.5" x 20" (622mm x 900mm x 508 mm)

Working Liquid Depth: 18" (458mm)

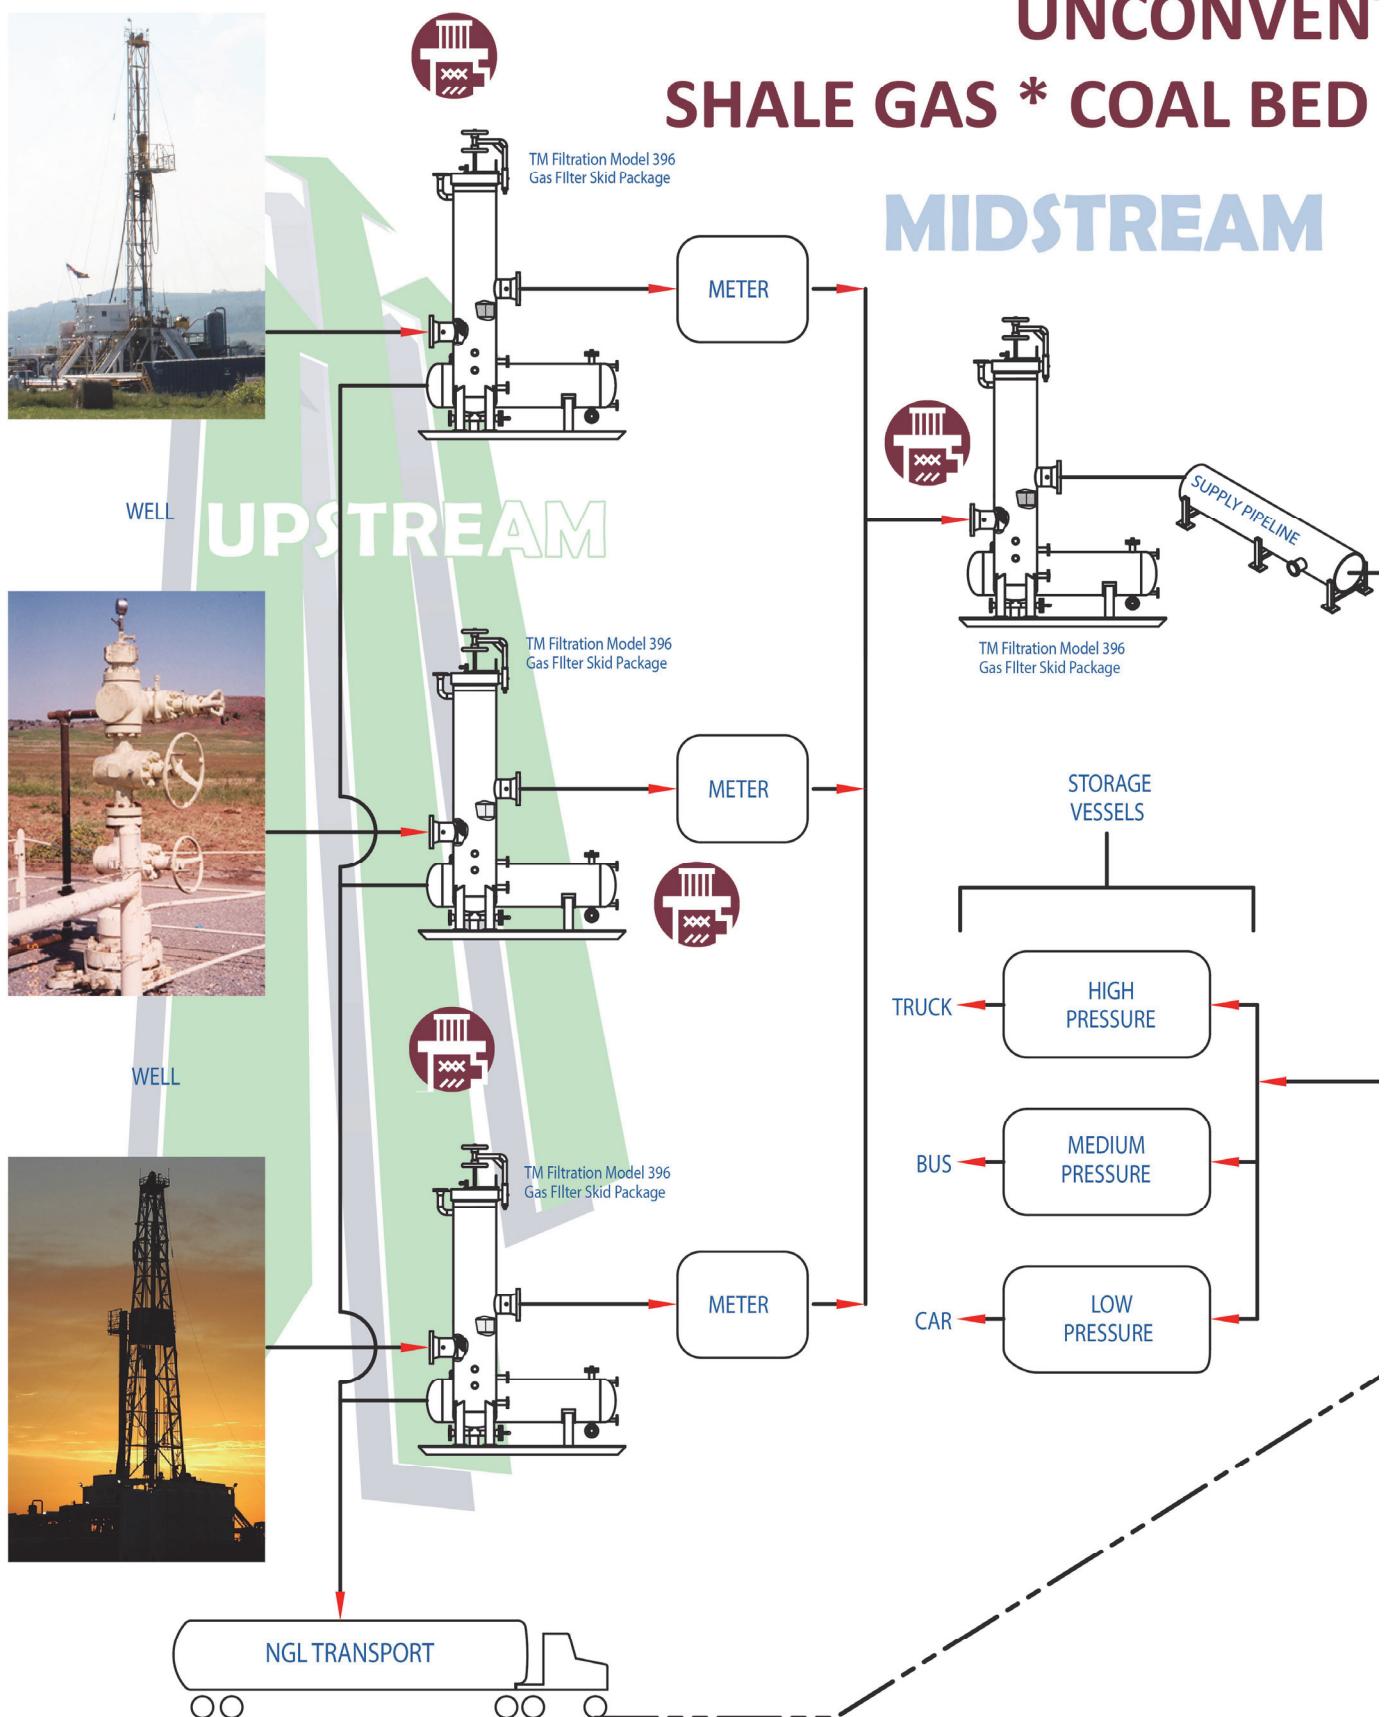

Power Requirement: 120 V, Single Phase, 60Hz (other styles available)

Notes: Dimensions and options availability are subject to change without notice. Please consult the TM Sales Department or your local sales representative for certified drawings, or additional information.

TM Filtration

DISPOSABLE "OLD STYLE" COALESCING FILTERS & REPLACEMENTS

LP Series (Disposable)

Aluminum Threaded Coalescing Filters with "In to Out" Flow

**Pressure 232 PSI
Flows to 1500 SCFM
Sizes 1/4" NPT THRU 3" NPT**

HP Series (Disposable)

SS Threaded Coalescing Filters with "In to Out" Flow

**Pressure 725, 1450, or 5000PSI
Flows to 2000 SCFM
Sizes 1/4" NPT THRU 2" NPT**

TM Filtration

LP SERIES COALESCING FILTERS

LP & HP ELEMENT GRADES

- 5 micron (Course Coalescing)
- 1 micron (Fine Coalescing)
- 0.01 micron (Very Fine Coalescing)
- Active Charcoal (Vapor Removal)

Please consult the TM Sales Department or your local sales representative for additional product information, drawings or for selection assistance.

Going "Green", is a global movement to become more aware of the impact a product has on the environment.

TM Filtration's patented cleanable coalescing elements are manufactured using materials that may be cleaned using commonly available ultrasonic cleaning methods.

INDUSTRIES SERVED:

NGL—NATURAL GAS LIQUID
LGN—LIQUEFIED NATURAL GAS
SHALE OIL MIDSTREAM PROTECTION
FLARED GAS
COAL BED METHANE
SYNGAS
IGCC
BIOFUEL & SYNGAS PRODUCTION
LANDFILL GAS RECOVERY
NATURAL GAS PROCESSING & TRANSMISSION
GAS FUELED POWER PLANTS
COMPRESSED GASES PRODUCTION;
AIR , AMMONIA , ARGON
HELUM, HYDROGEN, METHANE
NITROGEN, AND OTHERS

COMMON APPLICATIONS:

GAS COMPRESSOR PROTECTION
TURBINE PROTECTION
GAS WELL FILTRATION
VACUUM PUMP PROTECTION
AIR COMPRESSOR PROTECTION
GAS DRYER PROTECTION
METER PROTECTION
INSTRUMENTATION PROTECTION
HEAT EXCHANGER PROTECTION
AEROSOL REMOVAL
